

Wall Hanging Brackets

Enclosed

- StepRack Wall Mounted or Filing Cabinet Rack A
- 18 Key Fobs
- 2 self-adhesive Hanging Brackets Left & Right

Instructions

1. Remove Product from box and plastic bag
2. Place left hand bracket and stick to your chosen position - dry wall, kitchen cupboard any suitable hanging area - by removing blue tape, making sure the opening is to the left and perpendicular
3. Measure inside edge to inside edge, then place the right hand bracket exactly 335 mm from left wall bracket and repeat by removing blue tape and stick to your chosen location (see image)
4. Place the A Suspension File Rack into the left or right open wall bracket, with the natural plastic/polymer hinge ready to fold onto each side of Rack A, while lowering into hanging position. Close each hanging bracket lightly onto the Rack A, holding the product into a wall hanging position. Reverse the process using the polymer/plastic hinge to take rack from wall and place into filing cabinet if you wish (see image)
5. Add your keys to each fob, record data of each key on the identifier sheet (which you can contact and download from StepRack as a PDF) or on cell/mobile StepRack App. Place your numbered keys, into each matching numbered 1 to 18 pocket/slot, on each position on Rack A male to female pockets

Should you require more Racks:

- Contact StepRack to place an order for Rack, B, C, D etc and Commercial Installations
- Individual QR codes for each fob are available. This unlocks the commercial level of the App and enables the user to scan via StepRack App for Business to Business Level for Scanning Multiple Keys
- Please contact StepRack for Commercial Quotation in which will introduce you to our Business Solution for Multiple Key Management and Biometrics
